

Subject: FW: BMC Bioinformatics: Decision on your manuscript
Date: Friday, June 5, 2026 at 05:22:16 Eastern Daylight Time
From: Kinney, Justin
To: Liu, Leo

Hi Leo, BMC Bioinformatics wants a minor fix to the manuscript before they send it out for review. Can you address #1. I'll then do #2 and resubmit? -Justin

Deadline: 14 Jun 2026

Dear Dr Kinney,

Your manuscript, "PoolParty: streamlined design of DNA sequence libraries in Python", has now been assessed.

Before we can proceed with peer review, please address the below points:

1. In the "Data Availability" Declaration on the manuscript submission system, please include the details of where the secondary datasets analysed in your study were originally obtained from (e.g. PlantTFDB) and the original permanent accession numbers/identifiers/links/citations for the specific datasets used.
2. Please ensure that the statement given in the "Data Availability" section of the SNAPP submission system matches the statement included in the "Availability of Data and Materials" section of the manuscript. When submitting your revised manuscript, please select 'yes' under the data availability declaration and input your data availability statement in the appearing

textbox.

3. At this stage, we ask that you submit a clean version of your manuscript and do not include any track changes or highlights.

We invite you to revise your paper, carefully addressing the comments from the reviewers and the editor. Please ensure the results are accurately reported, any overstated conclusions are rewritten and the limitations of the work fully explained. When your revision is ready, please submit the updated manuscript and a point-by-point response. This will help us move to a swift decision.

We recommend submitting all revisions within the mentioned deadline.

If you need more time, please contact us and include your submission ID.

Kind regards,

Payel Karmakar
Assistant Editor
BMC Bioinformatics

When your revision is ready, the original submitting author, Justin Kinney, must upload a revised manuscript and a point-by-point response. To view any reviewer reports, editor feedback, and the instructions for submitting your revision, please visit your submission details page:
